Designed for both indoor and outdoor use, the compact Move/5000 is the perfect business companion for hospitality, high street and small merchants, creating a seamless shopping experience that's free from the checkout.

Fast introduction with Telium TETRA OS
The Telium TETRA OS integrates with existing payment methods to ensure a seamless introduction into a business' payment environment. Merchants also have greater control over the payment experience that they're offering customers by utilising useful HTML5 applications.

Alternative payment methods
From mobile wallets to traditional payments schemes, Move/5000 has it covered. The Move/5000 contains payment hardware such as NFC couponing, chip & PIN, swipe and sign, contactless and more to facilitate the processing of alternative payment methods – including those enabled by camera, like QR codes.

Highest security
The Move/5000 is certified and fully compliant with the latest global and local PCI regulations. The Telium TETRA OS has been future-proofed with top-of-the-line cryptography software and Ingenico's world-class peer-to-peer encryption technology to keep data safe.

Maximized network availability
Even on the go, those using the Move/5000 terminal will have strong connections to the internet. That's because this terminal utilises a wide range of wireless connectivity options and automatic network switching between 4G, 3G, 2G, Dual SIM, Bluetooth and WiFi – all fully optimised so that connection will always be viable.
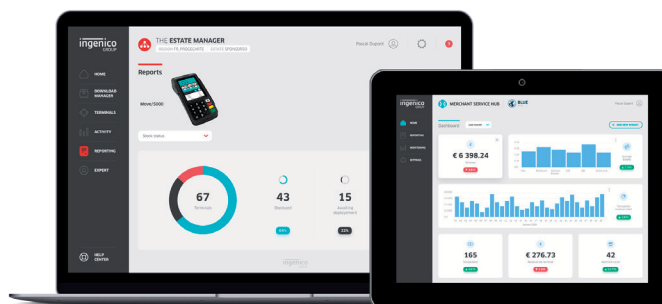

Optimal user-experience
This terminal is dynamic by design, and its intuitive user interface – including powerful multimedia capabilities and a large 3.5 inch colour touchscreen – creates an optimal experience for customers. Its new and ultra-responsive rubber keypad improves PIN entry for customers.

Compatible with Ingenico's suite of services
Keeping the solutions connected, the Move/5000 works in unison with Ingenico's supporting service platforms, meaning merchants will have access to business services such as back office reporting and e-receipt management. Software updates and day-to-day support deliver a hassle-free experience for those using this innovative range.

The Move/5000 is supported by our Cloud Services
