Global Payments
Terminal Plus

The point of sale that
can grow with you.

Innovation that **delivers.**

Terminal Plus

All Features. All-in-one POS

Run your business from the palm of your hand. Terminal Plus is a cloud-based, in-store POS solution that lets you run your business from a single, all-in-one device.

It features intuitive reporting and easy-to-use tools, without being overly complex and without a huge investment. With Terminal Plus, you can run your business better, whenever you want and wherever you are. It's perfect for busy, growing businesses – like yours.

- Quick, quiet thermal receipt printer
- Bi-directional barcode scanner

UniversalPAYMENTS

How It Works

The full Terminal Plus solution consists of three components:

1.Terminal Plus POS software

2.POS device/hardware (currently the PAX A920); and

3.Cloud-based back office

Vital POS [Terminal Plus] was recognized as the 2019 "Best Small Business Payments Solution" by the FinTech Breakthrough Awards!

Universal PAYMENTS

Terminal Plus Software

With Global Payments Terminal Plus, the transaction is created in the POS software and then sent to the payment app that resides on the same terminal.

1.Select Sale

2.Add items from *catalogue* (left / right arrows toggle through different categories)

3.Selecting items will add them to your cart

Q&A

What types of businesses use Terminal Plus?
Terminal Plus is ideal for businesses that are busier and bigger than those that might opt for using their personal mobile device and often still use a cash register and a 10-key keypad. Terminal Plus offers much better item control and reporting than traditional payment terminals or cash registers

Does this support a cash drawer?
No, Terminal Plus will not support a cash drawer.

Can the solution integrate with accounting platforms like QuickBooks?
No. The software can export transactions/reports into various formats like CSV.

Does this solution support gift cards?
No, there is a project underway to add Global Payments Gift+Rewards, in the future.

Does this solution support central balancing? (i.e. settle all lanes from one station)
No. Settlement must be initiated at each individual terminal. Auto settlement can be set up per terminal to optimize the merchant experience.

Does the solution support auto settle?
Yes, this can be configured by a Global Payments team member.

Is this available for rush orders?
No, due to system limitations, any Portico account with Debit will require 24-4184 hours to set up.

Is there a 4G supported?
Yes, 4G is available. The A920 functions similar to smart phone. If Wi-Fi is available it will default to wifi, if not it will switch to 4G automatically.

What can I do in the back office versus on the terminal?
Please refer to Exhibit B for a detailed breakdown of Terminal Plus functionality.
