# Poynt 5
Peripheral Guide

These devices can be connected with the Poynt 5 Smart Terminal to create the ultimate payment station.

Thermal Printers

Epson TM-M30 (WiFi)

This sleek printer is easily set up and completely versatile by enabling it through a network router or a USB connection. It delivers quality printing capabilities in a compact space and an updated look to match the innovative design of Poynt.

Star 654 (USB)

An option for businesses wanting to bypass setup with a network. USB connections require virtually no setup and transfer data information from the device lightning quick. This thermal printer also has a drop-in paper roll cavity for easy installation.

Additional Accessories

Charging Sleeve

This sleeve forms around the Poynt 5 like a standard phone case and protects from damage or normal wear and tear while allowing USB-C access. It also functions as an additional battery pack, extending the life of the device by four hours to take more payments.

Advanced Dock

Ergonomically designed to fit in the hand, the dock comes with a barcode/QR scanner and built-in standard-sized paper roll cartridge and printer to print receipts. Utilizes a magnetic mini charging pad for so you can periodically extend the device's battery life by four hours.
